Made in China

**EN ISO 12312-1:2013 + A1:2015**

**Regulation: (EU)2016/425**

**CAT.3: - High protection against sunglare**

### **EN**

- Sunglasses should not be used for direct viewing of the sun.
- Not for protection against artificial light sources, e.g. solarium.
- Not for use as eye protection against mechanical impact hazards.

### **Care instruction:**

- Be careful when wearing. Please use both hands to remove glasses and not with one hand, otherwise sunglasses are easy to deform.
- The cleaning method should be correct. When dirt and dust appear on the lens, microfiber lens cloth can be used to clean the lens.
- Place the glasses in a proper place. When sunglasses are not in use, try to wrap them with lens cloth and put them in a box for storage. Do not store with hard objects or objects with edges and corners to avoid scratching the lens.
- Keep away from chemicals, and try not to let sunglasses contact perfume, cosmetics and other things containing chemical ingredients, so as to avoid damage to sunglasses, which may lead to fading or deformation of the lens frame, and lens peeling. Once stained, please clean it up in time. In addition, if you sweat a lot, you should wipe it clean in time.

### **Warning:**

- Not suitable for driving at night or under condition of dull light.
